Summary

Platform-focused operations specialist with experience in system administration, workflow automation, and lifecycle governance across high-scale environments. Currently supporting Spark Driver through agent-guided workflow systems, platform configuration, and operational documentation. Known for building durable, scalable processes, improving lifecycle clarity, and translating complex system behavior into clear guidance for non-technical audiences. Trusted partner to Product, UX, Engineering, Automation, Legal, and Operations teams.

Professional Experience

Platform & Workflow Operations (UX and Communications Copywriter) | Walmart, Last Mile Delivery | Bentonville, AR | 2025 to Present

- Administer and document agent-guided workflow systems supporting Spark Driver, ensuring configuration accuracy, lifecycle clarity, and operational reliability.
 - Support workflow documentation and clarity for agent-guided workflow systems (CCA2), auditing logic for accuracy, consistency, and downstream impact.
 - Designed a reusable AI-assisted workflow export process that converts workflow data into structured documentation, reducing manual effort from hours to minutes and improving cross-team visibility.
 - Built Airtable-based operational systems - including a centralized resource hub and a structured process-improvement tracker - to improve onboarding, visibility, and prioritization across platform and workflow operations.
 - Authored and maintained high risk driver and agent content for pharmacy cold chain handling, reconstituted prescriptions, OTP flows, enrollment changes, login recovery, and background checks.
 - Created the Support Contact Points, Spark Driver Journey artifact consolidating all known support entry points across app and web.
 - Partner with Product, UX, Engineering, Automation, Legal, and Operations teams to validate assumptions, reduce compliance risk, and align content with platform behavior.
-

Freelance Email Operations, Content, and Platform Administrator | Self Employed | Remote | 2018 to 2025

- Served as an email communications and lifecycle operations administrator for ecommerce and SaaS clients.
 - Managed segmentation, tagging, scheduling, and automation across multiple email and lifecycle platforms.
 - Maintained list health through deliverability best practices, engagement-based filtering, and sender reputation monitoring.
 - Built automated lifecycle workflows supporting onboarding, retention, reactivation, and transactional messaging.
 - Designed and administered CMS-driven websites, including site architecture, content creation, customization, and maintenance.
 - Built dashboards to surface engagement metrics, content performance, and operational health.
 - Authored SOPs, onboarding guides, workflow documentation, and reference materials for non-technical teams.
 - Trained clients and contractors on email platforms, CMS usage, automation logic, and content best practices.
-

Technical User Support Analyst | Medtronic | Memphis, TN | 2018 to 2019

- Provided technical support and education for medical device sales software in a regulated environment.
 - Developed automation scripts and dashboards to reduce deployment effort and improve turnaround time.
 - Authored internal documentation and knowledge base content improving first pass resolution.
 - Coordinated with product and development teams to track issues and communicate solutions.
-

IT Support Specialist | City of Fort Smith Government | Fort Smith, AR | 2011 to 2018

- Supported over 1,000 employees and 1,200+ devices across multiple departments.
 - Managed workstation deployment and imaging processes to improve consistency and reduce setup time.
 - Built SOPs, troubleshooting guides, and internal documentation to standardize IT workflows.
 - Led automation and process improvements that reduced downtime and improved response times.
 - Coordinated vendors and supported cross department initiatives.
-

Skills

Platform administration

Airtable (schemas, dashboards, permissions), agent-guided workflow systems (CCA2), CMS lifecycle governance, user access management, tagging and taxonomy design, content lifecycle management

Automation and integration

Workflow automation, AI assisted documentation, Power Automate, Zapier, webhooks

Email and communications platforms

Experience with enterprise-grade email and lifecycle systems (e.g., Klaviyo, Mailchimp, AWeber, GoHighLevel, Lemlist, ActiveCampaign)

Analytics and optimization

Google Analytics, dashboards, KPIs, platform health monitoring, content performance analysis

Communication and enablement

Technical writing, SOPs, onboarding materials, UX aligned content, stakeholder collaboration

Technical foundations

Systems thinking, API fundamentals, Python, PowerShell, Windows administration, WDS, DNS, SPF, DKIM

Education

Bachelor of Science in Information Technology, Networking

University of Arkansas, Fort Smith

Cum Laude, Outstanding Networking Graduate of the Year

Certifications

Scrum Fundamentals Certified • FEMA Leadership and Influence • HubSpot Content Marketing • Klaviyo Product & Systems Training • Postman API Fundamentals • DHS Advanced Windows Scripting • DHS Cloud Computing Security

Selected Projects

AI-Assisted Workflow Export Automation Developed a reusable system that converts workflow data into structured documentation, improving review speed and cross-team visibility.

Support Contact Points, Spark Driver Journey

Created a UX-aligned artifact mapping all driver support entry points across app and web to resolve cross-team confusion, reduce inconsistent guidance, and establish a single source of truth for partner alignment.

[Whisper Desktop Technical Documentation](#)

Produced a portfolio-ready technical how-to guide demonstrating installation, configuration, and troubleshooting for a local speech-to-text application, showcasing clear, user-focused technical writing and system-behavior explanation.
